

## **NIH Toolbox 4-Meter Walk Gait Speed Test update**

### **November 2013**

Scoring for NIH Toolbox 4-Meter Walk Gait Speed Test was updated in November, 2013 to ensure that the correct raw score is used to calculate the computed score.

The system should use the best of the two test trial raw scores (i.e., the lowest timed score) but instead was using the score from the second administration trial (which may or may not have been the best score).

New computed scores have been recalculated for any affected participant records.
