

NIH Toolbox Words-in-Noise Test (WIN) version 2.0

November 2013

We updated the NIH Toolbox Words-in-Noise Test so that it **can be administered without an external sound card**.

The updated test is labeled version 2.0 in Assessment Center.

The NIH Toolbox Words-in-Noise Test version 1.0 remains available for those using the external sound card, but new users are advised to use version 2.0.
