

Decision Tree for Selecting a Patient-Reported Physical Function (PF) HealthMeasure

Select the PROMIS Adult Physical Function Short Form for your Purpose

- For screening, use PROMIS v2.0 Short Form 4a, 6b, or 8b
- For comparing large groups, use PROMIS v2.0 Short Form 10a
- For individual evaluation and comparing small groups, use PROMIS v2.0 Short Form 10a

Supplementary Measures

- If assessing adults with Huntington’s Disease, consider adding the Neuro-QoL HDQLIFE Chorea CAT or Short Form.
- If assessing adults with Sickle Cell Disease, consider adding the ASCQ-Me Stiffness Impact CAT or Short Form
- If interested in performance-based tests of motor function, consider adding NIH Toolbox Motor measures (e.g., Dexterity, Strength, Balance, Endurance, Locomotion) for ages 3 – 85
